SAVING ENERGY AND WASTE HANDLING

In each class we are continuing to separate waste. We have special bin just for paper. Plastic bin is the lobby of the school.

We also take care that food and packaging at breakfast and lunch are separated properly.

We are also aware of electricity waste. That's why we have in each class a police team who takes care to turn off lights when not needed, to open the windows and close them in right time and to take care of water pipe.

While washing hands we make sure that we do not let water run while waiting. And that we use only one paper towel as we have small hands.

Students from 5th grade wrote down their promises that they will take care of our planet.

By doing all this actions we also try to be humanitarian. Our 5th graders join to a project Sponsorship. They made a lovely movie to appeal parents, workers and other students to help people in need by bringing food to school.

They were really successful. 3 big boxes were full and delivered to Ljubljana.
